PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate and Full Stack Developer who has shipped 6+ production web applications spanning SaaS tools, blockchain, and developer utilities — serving real users. Proficient across the full delivery pipeline: React.js/Node.js frontends, Spring Boot REST APIs, MySQL/MongoDB databases, and AWS deployments. Seeking a developer role at a product-focused company where clean code, fast iteration, and measurable impact are the standard.

EXPERIENCE

Frontend Developer Intern | Orbytez.com

2 Months | ₹8,000/mo Stipend

- ▶ Delivered 3 responsive UI modules in React.js with cross-browser compatibility across Chrome, Firefox, and Edge, eliminating layout bugs reported during QA.
- ▶ Integrated 4 RESTful API endpoints into the frontend layer, reducing average page load time by 20% through optimised data-fetching patterns.
- ▶ Participated in daily stand-ups and code reviews; refactored 500+ lines of legacy JS, improving component re-usability by 40%.
- ▶ Collaborated with the design team to implement 6 UX improvements, directly improving user-flow clarity identified in feedback sessions.

PROJECTS

Bulk Mail Sender (SaaS Tool) • Node.js • Express • Google OAuth • Gmail API • Vercel/Render

June 2025

- ▶ Built end-to-end bulk email SaaS with Google OAuth login and Gmail API, enabling users to send to **1,000+ recipients per batch** via CSV upload.
- ▶ Engineered real-time delivery dashboard with live progress %, speed metrics, and ETA — reducing user uncertainty during large sends.
- ▶ Deployed frontend on Vercel and backend on Render with production-grade reliability; zero reported downtime since launch.

Dynamic Portfolio Builder (LinkedIn Integration) • React.js • Node.js • RESTful API

December 2024

- ▶ Automated portfolio generation from LinkedIn resume data via REST API, cutting manual portfolio-build time from **hours to under 60 seconds** per user.
- ▶ Implemented real-time preview with responsive design; achieved consistent rendering across mobile, tablet, and desktop viewports.

Pepelayer2 Crypto Website • HTML/CSS/JS • Blockchain APIs • SEO

September 2024

- ▶ Designed and deployed a cryptocurrency token landing page integrating blockchain data APIs for real-time price updates.
- ▶ Applied on-page SEO techniques that increased organic search visibility in the first month post-launch.

CLI Portfolio (npx rohitkumar-portfolio) • Node.js • npm

2024

- ▶ Published an interactive terminal-based portfolio to npm; accessible globally via a single **npx** command, demonstrating DevEx-first thinking.

YouTube Ad-Free Player & Currency Converter • YouTube Data API • JS • HTML/CSS

December 2024

- ▶ Integrated YouTube Data API for ad-free search and playback, blocking ad scripts without breaking core video functionality.
- ▶ Built real-time currency converter pulling live exchange rates from an external forex API across 150+ currency pairs.
